

THE OFFICIAL NECA 2026 LAS VEGAS SHOW GUIDE

October 4–7, 2026

Mandalay Bay Convention Center

WELCOME TO NECA 2026 LAS VEGAS

Welcome to NECA 2026 Las Vegas, the best convention and trade show for the electrical construction industry. Building on the incredible momentum from last year's event in Chicago, we return with our most extensive program yet, made even more meaningful this year as we celebrate NECA's 125th anniversary. This year's convention brings together more exhibitors than ever before, with companies from across the industry showcasing the newest advancements in power, light, communication technology and systems integration. NECA 2026 is a gathering of leaders, visionaries, skilled workers and innovators committed to shaping the future of our industry.

From the moment you arrive at Mandalay Bay, you'll experience unmatched education, meaningful networking and unforgettable events, including memorable keynote speakers and receptions designed to mark this milestone year in style.

To celebrate 125 years of NECA, we've built new experiences into this year's show floor.

Stroll through our History Walk exhibits to see how far our industry has come. Catch live conversations at the Creator Circuit, get a peek at the industry's newest tools and tech in the Showstopper Showcase, take in association programming in the NECA Theater and encourage the next generation of our industry on Apprentice Appreciation Day. 125 years is a remarkable milestone, and one worth pausing to reflect on. Since our founding in 1901, NECA has stood alongside electrical contractors through every era of change, always adapting, always leading and always putting our members first. That legacy belongs to every contractor, apprentice and partner who has helped build this association into what it is today. This convention is our chance to honor that history together, in person, while looking ahead to what the next 125 years will bring.

I want to extend my sincere gratitude to our Premier Partner companies for their continued leadership and commitment to our members. I also thank all our sponsors within NECA's Industry Alliance Network, whose support makes this world-class event, and this milestone year, possible. Their presence and programming enrich every corner of the show floor and provide real value to our attendees. A special thank you to all our exhibitors and our NECA team for always cultivating a spectacular trade show and convention. This annual collaboration truly makes the NECA Convention & Trade Show the best event throughout the trades, year in and year out.

NECA 2026 Las Vegas is a celebration of 125 years of progress and a launchpad for everything still ahead. Whether you're a contractor, apprentice, industry stakeholder or electrical enthusiast, this year's convention has something for you. Let's come together to learn, grow and celebrate the future of our trade.

Welcome to Las Vegas, to our 125th Anniversary and to NECA 2026!

David Long, CEO, NECA

Opening Reception

The Power of Connection

T-Mobile Arena

Sunday, October 4 • 7:00–9:00 pm

After Party • 9:00–10:00 pm

Get ready to spark connections and light up the night as we celebrate 125 years of empowering lives and building community! T-Mobile Arena is the ultimate gathering place where energy, excitement and inspiration come together. You'll find multiple levels filled with exciting experiences, delicious food and live music. Join colleagues and new friends for this one-of-a-kind celebration to the cooperation, support and the values that have propelled NECA since 1901.

Closing Celebration

Celebrate 125 Years!

featuring +LIVE+ and O.A.R.

The Beach at Mandalay Bay

Wednesday, October 7 • Doors: 7:30, Music starts 8:00

The Mandalay Bay Beach—a world-famous playground with a wave pool, 2,700 tons of real sand and a concert stage front and center—sets the stage for an unforgettable closing celebration for NECA's 2026 Convention in Las Vegas! This beachside music festival atmosphere invites attendees to dance and celebrate the night away with incredible live entertainment, food, drinks and immersive experiences. Multi-platinum rock band +LIVE+ will feature their iconic catalog of hits including "Lightning Crashes" and "I Alone," while O.A.R. will kick things off with crowd favorites like "Shattered (Turn the Car Around)" and "That Was a Crazy Game of Poker" in their signature high-energy performance style. A live DJ will provide music sets throughout the evening and will close out with a late-night set. Blending nonstop entertainment, a dynamic festival atmosphere and the unmatched energy of Mandalay Bay Beach, this once-in-125-years celebration promises to be a standout highlight of 2026 in Las Vegas.

Opening General Session

NICK SABAN

Legendary Hall of Fame Football Coach, ESPY Icon Award Winner, Emmy Award Winner
Monday, Oct. 5

Nick Saban is the most iconic coach in college football history with a legacy defined by leadership, culture, and championship success. Best known for restoring the University of Alabama to dominance, Saban led the Crimson Tide to 6 national titles. With another at LSU, he has 7 National Championships overall, a feat unmatched in the poll era. He earned his reputation as an outstanding tactician, leader, organizer, and motivator through his consistent approach and disciplined leadership known as “The Process.”

Sponsored by Graybar

Tuesday General Session

ANDRE AGASSI

Tennis Champion, Educational Entrepreneur, Author
Tuesday, Oct. 6

After turning pro at the age of 16, tennis prodigy Andre Agassi rose to international fame, earning 60 men's singles titles, including eight Grand Slam singles championships, over a 20-year career. A former World No. 1 player, Agassi is the first male player ever to win all four Grand Slam titles and an Olympic gold medal. He was also a member of three winning Davis Cup teams. On July 9, 2011, Andre was inducted into the International Tennis Hall of Fame.

Sponsored by Schneider Electric

Closing General Session

MELISSA STOCKWELL

2016 Paralympic Bronze Medalist, World Champion, Veteran, Author
Wednesday, Oct. 7

Melissa Stockwell was the first female American Soldier to lose a limb in Operation Iraqi Freedom. Her vehicle was hit by a roadside bomb on April 13, 2004, resulting in the loss of her left leg, above the knee. She was honored with a Purple Heart and a Bronze Star for her service. She has represented the U.S. in three Paralympic Games and remains one of the world's most elite Para-triathletes.

INNOVATION ZONE

Welcome to the Innovation Zone where we will highlight the ever-changing landscape of construction technologies and showcase solutions and best practices that allow you to achieve your highest potential. Learn from industry leaders, specialized experts and contractors at the cutting-edge of innovation.

■ **NEW! Ask an Expert**

This is your chance to engage directly with industry leaders, innovators and contractors who have successfully tackled the challenges facing electrical construction today. Join us for candid conversations, practical advice and proven strategies on the topics that matter most. Bring your questions, share ideas and leave with actionable insights to help take your company to the next level.

- **Monday, Oct. 5:** 12:00–1:00 pm, **A.I. in Action:** Policies, training, risk-assessment and practical applications for delivering measurable results
- **Monday, Oct. 5:** 3:00–4:00 pm, **Succession Planning:** A.I. policies, training, risk-assessment and practical applications for delivering measurable results.
- **Tuesday, Oct. 6:** 12:00–1:00 pm, **Championing Continuous Improvement:** Building a culture of continuous improvement, identifying inefficiencies, engaging teams in meaningful change and turning small improvements into measurable results across your business.
- **Tuesday, Oct. 6:** 3:00–4:00 pm, **Prefab & Modular Playbook:** Proven strategies to launch, scale and optimize off-site construction operations
- **Wednesday, Oct. 7:** 10:00–11:00 am, **Winning in Data Centers:** Labor, risk and execution strategies for high-demand data center projects
- **Wednesday, Oct. 7:** 11:00 am–12:00 pm, **Build People. Build the Future:** Building effective training programs, creating meaningful mentoring relationships, developing talent at every level and equipping the next generation with the skills, confidence and support needed to grow and succeed in our industry.

■ **Innovation Overload Podcast**

The Innovation Overload Podcast will be recording live in the Emerging Innovation Hub. Check out stories and case studies and learn how innovation can make a difference in all areas of your business. Join us live as our expert guests share their best wisdom and strategic maneuvers:

- **Monday, Oct. 5:** 11:30 am, 1:00 pm, 2:30 pm, 4:00 pm
- **Tuesday, Oct. 6:** 12:15 pm, 1:45 pm, 3:15 pm
- **Wednesday, Oct. 7:** 9:45 am, 11:15 am

■ **NECA Creator Circuit: Where the Industry Meets the Microphone**

Before you walk onto the trade show floor at NECA 2026 Las Vegas, you will notice something new. Bright signage, futuristic lighting and a buzz of activity mark the entrance to the NECA Creator Circuit—a brand-new feature built to capture the energy of the electrical construction industry and broadcast it to the world.

At its heart is a lineup of professional recording booths where creators capture conversations with NECA leadership, subject matter experts, contractors, apprentices, attendees and exhibiting companies in real time. Catch a familiar face like Mike Holt behind the mic or discover a new voice from the trade's next generation.

Nearby, the Influencer Stalls offer compact, camera-ready spaces for quick-turn content. Rounding out the circuit is a TED Talk-style stage with seating for short talks, panel conversations and audience participation.

The Creator Circuit gives the conversations happening at NECA on workforce development, technology and the future of the trade a bigger audience, turning convention week into content that reaches the industry well beyond Las Vegas. Stop by, sit in or step up to share your perspective. Everyone walking through that door is invited to be part of the story.

SIXTH ANNUAL

Electrical Contracting Innovation Challenge

Sunday, October 4 • 1:30 pm–3:00 pm

The Electrical Contracting Innovation Challenge is ELECTRI International's annual challenge for NECA Student Chapters. Student Chapter teams agree that the popular challenge is stimulating because it encourages problem-solving through new and creative thinking. This year's challenge focuses on the full project lifecycle of an electrical construction project by integrating lessons from past competitions in bidding and estimating, project management, BIM coordination and design-build innovation.

Tuesday General Session

NECA Member Recognition

Tuesday, October 6
10:00–11:30 am

Join us as we celebrate members who exemplify excellence in our industry, recognizing achievements in project delivery, innovation, leadership and professional development. We will recognize graduates of the **NECA Leadership Institutes**—programs that develop electrical industry professionals, strengthening leadership, management and safety skills to advance both their organizations and the industry and the **NECA/ELECTRI Project Management Apprenticeship**. Recipients of the **NECA Project Excellence Awards**, which acknowledge the extraordinary work performed throughout the year by NECA contractors, will also be acknowledged.

APPRENTICE APPRECIATION DAY

APPRENTICE CHALLENGE!

Back by popular demand!

Monday, October 5
Program: 10:00 am–12:00 pm
Trade Show/Apprentice Challenge:
12:00 pm–5:00 pm

Celebrate the future of our industry at Apprentice Appreciation Day! Hear from **Nic Bittle**, leadership expert and founder of NicBittle.com, and **Mike Holt**, founder of Mike Holt Enterprises and world-champion barefoot water skier. Take part in an immersive experience with industry social media influencers and even have the chance to be featured on a live podcast. Join us for a day of inspiration, learning and recognition designed specifically for the next generation of electrical professionals.

Speakers include:

- **AJ Zartman**, Chief Operating Officer, Diversified Utility Services (Cal-Nev Trustee)
- **Jesse Newman**, Business Manager, IBEW Local 396
- **Jeremy Newman**, Assistant Business Manager (Cal-Nev Trustee), IBEW Local 396
- **Jimmy Skinner**, Executive Director, Cal-Nevada JATC
- **Richie Work**, Business Manager, IBEW Union Local 357
- **Julie-Ann Peeples**, Training Director, NECA-IBEW Electrical JATC of Southern Nevada
- **Matthew Dustin**, Executive Director, Southern Nevada Chapter NECA
- **Jules Weaver**, Executive Director, Western Line Constructors NECA
- **Todd Stafford**, Executive Director, electrical training ALLIANCE
- **Steve Richman**, CEO, TTI

Moderators: **Jon Mandal**, Executive Director, Labor Relations, NECA

Robbie Foxen Executive Director, District 10, NECA

Paul Flynn, Director, Workforce Development, NECA

Keynote Speaker: Nic Bittle

Lunch will be provided to all apprentices!

Apprentice Challenge: NEC Escape Room

We are thrilled to announce that, thanks to the Los Angeles Electrical Training Institute, the NEC Escape Room Challenge is BACK! This interactive experience is designed to test the knowledge and skills of apprentice attendees on the National Electrical Code (NEC) in a fun and engaging way. Senior Instructor Geoff Gardner, known as the “Escape Room Genius,” has dedicated countless hours and considerable brainpower to crafting our escape room’s layout, plan and design. The NEC Escape Room Challenge is a unique, hands-on activity where apprentices navigate through a series of puzzles that require a solid understanding of the NEC. Participants must apply their knowledge to solve the challenges and escape the room while timed.

Outside Line Apprentice Challenge

NECA 2026 Las Vegas Apprentice Appreciation Day will feature an immersive experience just for outside line apprentices. Housed in High Voltage Village, don’t miss the hands-on apprentice challenges tailored to your experience level:

- **Transformer Connection Challenge:** Demonstrate your skills by making transformer connections using the Transbanker system. Thanks to Northwest Line AJATC for providing support and trailer setup.
- **Hot Sticking Challenge:** Showcase your hot sticking abilities utilizing a new Hot Stick trailer. Thanks to Mountain States AJATC for their support and trailer setup.
- Check out the Walking Classroom—an immersive, self-guided tour on the Trade Show Floor.

THE NECA SHOW: YOUR INDUSTRY SOLUTION CENTER

NECA Show Hours:

- **Monday, October 5**
11:30 am–5:00 pm
- **Tuesday, October 6**
11:30 am–4:00 pm
- **Wednesday, October 7**
9:00 am–1:00 pm

Still the undisputed leader in the electrical construction industry, the NECA Show continues to grow. The NECA Show puts you face-to-face with manufacturer execs so you can discuss your specific needs for the job site, shop or office. Our goal is to provide the products and services electrical professionals need to stay competitive in the marketplace.

The NECA Show floor is an interactive classroom. This is the place to test new products and learn about solutions that will drive efficiencies and better results.

- Talk with company execs from **350+ exhibitors**.
- Explore more than **150,000 square feet of booths** filled with thousands of products and services covering all aspects of the growing electrical construction industry.
- Attend any of the 33 **trade show education** workshops: Construction Solutions, Technology and Innovation, and Leadership.
- Visit the **Showstopper Showcase** sponsored by **ELECTRICAL CONTRACTOR** magazine to see the industry's newest products introduced in the market within the last 12 months.
- Learn how to play your favorite Vegas games without the risk in the **Casino Zone**, sponsored by Southwire!
- Take a break and recharge in the **Rest & Recharge Lounge**, sponsored by Southwire, featuring complimentary chair massages and an oxygen bar.

NECA Showstopper Showcase

Technology and innovation are constantly driving manufacturers to bring new products and services to the market. They know that your success is their success. So be among the first to see the newest products, technology and services at the NECA Showstopper Showcase and Awards. Sponsored by **ELECTRICAL CONTRACTOR**, the Showstopper Awards are the most prestigious recognition for manufacturers in the electrical construction industry. The Showcase features entries representing the latest solutions on the market. These innovative advancements aid electrical contractors on the job and in the office.

High Voltage Village: A Can't-Miss Experience

Make sure to carve out time for the High Voltage Village, an experience designed exclusively for outside line apprentices and those passionate about the future of line work. As the electrical industry continues to evolve, so does the work of the men and women who keep our grid running—and this dedicated zone puts that evolution on full display!

- Hands-on demos with the latest tools and technology, giving apprentices a chance to see firsthand how the trade is changing
- A front-row seat to the innovations shaping outside line work, from advanced equipment to new safety practices
- Networking opportunities with peers and leaders from across the country, building relationships that can shape a career for years to come
- Live demonstrations from top contractors and manufacturers showcasing the skills and tools driving the industry forward
- A chance to connect with mentors and industry veterans who can offer guidance on training, certification and career growth

Outside line work is physically demanding, highly specialized and absolutely essential to modern life. The High Voltage Village honors that reality and gives the next generation of lineworkers a space where curiosity is encouraged and hands-on learning takes center stage.

Celebrate the people powering our grid, literally. High Voltage Village is where the next generation of electrical lineworkers connects, learns and gets inspired for what comes next in their careers.

Experience 125 Years, Right on the Show Floor

At NECA 2026 Las Vegas, attendees will step into an immersive anniversary experience that brings our history to life. Through curated exhibits featuring historical documents, milestone projects, vintage materials, tributes to membership and archival photography, you'll explore how NECA has helped shape the electrical contracting industry over the decades.

Guided throughout the trade show floor, you'll follow a thoughtfully designed journey that highlights key moments in NECA's evolution while connecting you with the innovations shaping its future. Interactive elements along the way invite you to engage even further, unlocking exclusive stories behind the breakthroughs that built our industry.

As you complete the experience, you'll be recognized for being part of this milestone celebration with a special commemorative gift, marking your place in NECA's 125-year legacy. This journey connects where we've been with where we're headed.

Celebrate Together in Las Vegas

The 125th Anniversary will be woven throughout the entire convention experience, from the Opening Reception at T-Mobile Arena to the unforgettable Closing Celebration at Mandalay Bay Beach, a once-in-a-generation event designed to honor this historic milestone.

These moments are more than celebrations. They are opportunities to connect, reflect and recognize the shared values that have propelled NECA for 125 years: collaboration, leadership and a commitment to excellence.

Honoring the Past. Inspiring the Next 125 Years.

As we celebrate this landmark anniversary, we also look ahead, to new technologies, new challenges and new opportunities. NECA's legacy is built on progress, and the next chapter will be defined by the same spirit of innovation and connection that has carried us this far.

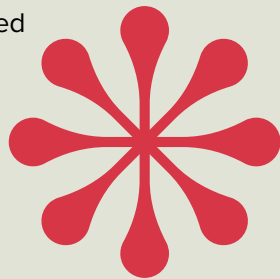

Join us in Las Vegas as we honor our history, celebrate our community and power the future, together.

THE NECA THEATER

Explore 125 years of NECA through five immersive exhibit booths on the show floor, each dedicated to a pillar of NECA's legacy, before arriving at the NECA Theater for an exclusive 125th anniversary documentary. Catch the full story of electrical contracting from 1901 to today and pick up your commemorative anniversary challenge coin on your way out. Keep an eye out around the show floor for special 125th celebrations throughout the show!

Once you have completed the 125th History Walk and Theater, visit the Emerging Innovation Hub 6718 to pick up your commemorative 125th coin.

PAUSE FOR PAWS

It's a proven fact that petting an animal can lower stress. Indulge in some puppy love and stress relief at the **Pause for Paws** park on the NECA show floor. Every moment spent with these furry companions not only brings happiness but also supports a worthy cause—Las Vegas animal shelter **PAWsitiv Difference**, dedicated to making a difference in the lives of animals.

Convention education sessions are included in the full registration package or can be purchased as a standalone. Full course descriptions and speaker biographies are available at www.necaconvention.org.

MONDAY, OCTOBER 3

8:00 am–9:50 am PDT, Breakers L

Is Your Sales Team Doing the Heavy Lifting?

David Bavisotto, *IKM Building Solutions, Inc*

In this sales leadership session, you'll learn why maintenance items and sticky services are the foundation of a strong service business and how to build a sales strategy that increases profit, reduces risk and creates consistent revenue even when construction cycles soften. This session will break down the different types of sales roles and how to structure responsibilities, goals and incentives.

8:00 am–9:50 am PDT, Lagoon G

Making Innovation a Reality: From Idea to Impact

Moderated by Tauhira Ali, *NECA*

Great ideas are only valuable when they are successfully implemented. Learn how leading NECA contractors turn concepts into real-world results by embedding innovation into daily operations. Explore practical strategies for overcoming resistance, aligning teams and scaling new approaches across projects and business units. Leave with actionable insights to drive measurable impact and make innovation stick within your organization. [\[CL\]](#)

8:00 am–9:50 am PDT, Lagoon I

The Road Ahead

Kelcey Henderson and Nate Scott, *Continuum*

The electrical contracting industry is entering a period of unprecedented opportunity and disruption driven by rapid growth, increasing complexity and accelerating change in how work is delivered. This session shares the results of ELECTRI's Road Ahead research, drawing on interviews and in-depth analysis to identify the trends that will define the next decade. [\[EI\]](#)

8:00 am–9:50 am PDT, Breakers I

The Role of the Trustee: What You're Responsible For and What's at Risk

Todd Stafford and Greg Greiner, *electrical training ALLIANCE*

This session clarifies the responsibilities and risks associated with serving as a JATC trustee under ERISA. You will learn how decisions related to expenses, policies and vendors are evaluated and where common compliance issues arise.

8:00 am–9:50 am PDT, Breakers J

Succession Planning

David O'Brien, *RD Construction Consulting, LLC*

There are many ways to transfer ownership from the founders to children, key employees or independent third parties. This session will discuss the methods, planning strategies, document drafting and other major concerns.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers G

Are You Getting the Most Out of NECA?

Jill Clark, Tom Lipka, David Manderson and Tracy Landers, *NECA*

You're part of the premier association for electrical contractors and have access to invaluable content, programming and opportunities, but what should you focus on? This session, delivered by NECA field representatives, will help you prioritize which programs and services will have the most immediate effect on your business.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Lagoon J

Construction Technology and the Role IT Plays

Matt Lamb, *Rosendin*

Construction technology is rapidly reshaping how ECs operate and compete. This session highlights the latest innovations and what they mean for your business. Learn how to align technology investments with strategy, build the right IT infrastructure and support long-term growth. [\[CL\]](#)

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Lagoon K

Key A.I. Functions for Electrical Contractors

Chris Carr, *Dynaimix*

Artificial intelligence is already transforming how electrical contractors operate, if you know where to apply it. Learn what foundational tools and processes need to be in place to successfully adopt A.I.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers K

Lead a Mental Health Initiative That Actually Works

Sally Spencer-Thomas

Many workplace mental health efforts start strong but fail to create lasting impact. Discover why initiatives lose traction and what leaders must do differently to drive meaningful cultural change. Learn how to align mental health with safety, model credibility and implement sustainable strategies that build trust.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers H

Navigating a New Washington: Current Issues and the Midterm Election

Moderated by Marco Giamberardino, *NECA*

The NECA Government Affairs team will provide an in-depth policy discussion on the current issues impacting the electrical construction industry. This session will provide an update on the current regulatory and political environment, the state of play on other issues such as permitting reform, the forthcoming highway bill, elections forecast and what it means for ECs.

Partnering Over Competing

Moderated by Josh Bone, *ELECTRI International*

ECs benefit from partnering with other contractors and service providers because collaboration expands capabilities without increasing overhead. Strategic partnerships allow contractors to offer more comprehensive solutions, share specialized expertise and pursue larger or more complex projects that would be difficult to win alone. [\[CL\]](#) [\[EI\]](#)

TUESDAY, OCTOBER 6

8:00 am–9:50 am PDT, Lagoon J

Building the Workforce Pipeline: IBEW Membership Development, The Digital Organizing Department and NECA Workforce Development

Moderated by Paul Flynn, *NECA*

This session examines how to build a strong and sustainable workforce through coordinated recruiting, membership development and industry collaboration. Using real-world examples, the session connects workforce strategies to long-term industry success.

8:00 am–9:50 am PDT, Breakers G

NECA Mental Health Safety Roundtable

Moderated by Wes Wheeler and Mike Starnier, *NECA*

Join industry leaders for a discussion on mental health and well-being in electrical construction. Explore strategies around prevention, intervention and postvention to support workers and learn how to recognize those in need and provide meaningful guidance and resources.

8:00 am–9:50 am PDT, Lagoon I

Planning for Productivity

Moderated by Amelia Celoza, *University of Colorado Boulder*

Planning is essential to successfully deliver projects. This session will highlight actionable strategies to improve planning practices in electrical construction, such as developing clear handoff processes, tracking actionable metrics and aligning milestones and plans across teams. [\[EI\]](#)

8:00 am–9:50 am PDT, Lagoon G

Innovation as a Company-Wide Advantage

Moderated by Tauhira Ali, *NECA*

Great ideas are just the beginning; scaling them is where the real challenge begins. Hear from contractors as they break down how they standardize, scale and sustain innovation. This session will focus on practical strategies to operationalize innovation, align teams and bring new approaches to life at every level of the business. [\[CL\]](#)

8:00 am–9:50 am PDT, Breakers K

You Won a Mega-Project Contract: Avoiding the Most Common Claims and Legal Pitfalls

Lori Azzara and Anthony Byler, *Cohen Seglias Pallas Greenhall & Furman, PC*

Winning a megaproject creates opportunity and carries significant risk. Learn how to navigate complex contracts, manage cash flow and avoid common disputes. Explore practical strategies for change management, documentation and protecting your rights to deliver large projects successfully and avoid costly pitfalls.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Lagoon H

Build Up Your Maintenance Business Before 2030

Moderated by Fred Sargent, *Great Service Forums*

Economic forecasters now envision a major downturn starting in 2030 that will likely continue for 5 or 6 years. Electrical contractors who move decisively to balance their business mix by developing a strong maintenance work component will weather the economic storm far better than their competitors depending solely on new construction. [\[CL\]](#)

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Lagoon K

Delegation Isn't Letting Go of Work, It's Letting Go of Control

Nic Bittle

This session reframes delegation as a critical leadership skill built on trust, clarity and accountability. You will learn to identify common barriers to delegation and how to set clear expectations that drive results without micromanaging.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers I

How JATCs Actually Work Today: Training, Performance and Workforce Impact

Todd Stafford and Greg Grenier, *electrical training ALLIANCE*

Apprenticeship programs have evolved and understanding how they operate today is critical. This session will examine modern training approaches, including performance-based progression and digital learning methods, and show how these changes impact workforce readiness and more.

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers J

Power Up Your Data Center Projects

Mike Carroll and Rich King, *Graybar*; Jon Miller, *Archkey*

This session will discuss how to optimize supply chain partnerships to improve logistics, technical execution and project efficiency. Capabilities such as kitting, inventory management and technical support will be discussed. [\[CL\]](#)

8:00 am–8:50 am PDT • 9:00 am–9:50 am PDT, Breakers L

Project Labor Agreements and Prevailing Wages: Legal Update and Compliance Basics

John Harras, *Venable LLP*

Navigating PLAs and prevailing wage laws has become increasingly complex in today's regulatory environment. This session breaks down current requirements, risks, and compliance strategies for federal construction projects.

Small Business Administration: How to Maximize Access to Capital and Financing

Moderated by Ryan McGuire, *NECA*

Access to capital is critical for small contractors looking to grow and compete. Learn how SBA programs, including loans, grants and federal contracting opportunities, can support your business.

WEDNESDAY, OCTOBER 7

8:00 am–8:50 am PDT, Breakers K

Advancing Electrical Service and Maintenance Practices

Toby Mitchell, *Classic Electric & Consulting Corp.*

Using ELECTRI's research on service and maintenance, this session will demonstrate how ECs can strengthen their service and maintenance offerings. Participants will be introduced to the Service Readiness Assessment and will gain practical strategies contractors can use to expand their service sectors and clearly communicate the value of service to customers. [\[CL\]](#) [\[EI\]](#)

8:00 am–8:50 am PDT, Breakers G

Are You Getting the Most Out of ELECTRI?

Jessica Cardenas and Laura Holmes, *ELECTRI International*

ELECTRI International offers powerful resources that many contractors underuse. Discover how to access research, business coaching, benchmarking tools and career development resources. Learn how to integrate these tools into your business to drive performance and growth. [\[EI\]](#)

8:00 am–8:50 am PDT, Lagoon K

Build Your Own Bot: Custom GPTs for Electrical Contractors

Carl Britton, *Iron Thread Consulting*

Custom A.I. tools are quickly becoming a competitive advantage for ECs. Learn how to build secure, company-specific GPTs, using your own data, without coding.

8:00 am–8:50 am PDT, Breakers J

Building a Workforce Brand That Works: Using Social Media to Attract and Retain Talent

Moderated by Vincenzo Pace, *Unity Electric*

Your digital presence is often the first impression potential employees have of your firm. This session shows electrical contractors how to use social media to clearly communicate their brand, showcase company culture and attract in-demand roles like estimators, project managers and APMs.

8:00 am–8:50 am PDT, Breakers H

I-9 and Worksite Enforcement: The Current State of Play and Best Practices for Compliance

Tim D'Arduini and Natalia Gouz, *Klasko Immigration Law Partners*

Work site enforcement is increasing, bringing greater scrutiny to employer compliance practices. Learn how evolving policies, audits and inspections impact electrical contractors and where

hidden risks often exist and explore strategies for conducting internal evaluations and strengthening your compliance program.

8:00 am–8:50 am PDT, Lagoon I

Scaling Prefabrication Operations: Maintaining Quality Across Multiple Shops

Steve Rose, *Los Angeles Electrical Training Institute (LAETI)*

As prefabrication expands across multiple facilities, maintaining consistent quality becomes a critical challenge for electrical contractors. Explore how standardization, process control and workforce training enable scalable, repeatable results.

8:00 am–8:50 am PDT, Lagoon J

The 2026 NEC: Key Changes Every Electrical Contractor Should Know

Kyle Krueger, *NECA*; Alan Manche, *Schnieder Electric*

Major updates in the 2026 National Electrical Code will directly impact how work is designed, installed and inspected. Review the most significant changes, including updates to protection requirements, grounding and system design and learn how to avoid common compliance issues.

8:00 am–8:50 am PDT, Breakers I

The Importance of Cash Flow

Mark Federle, *Marquette University*

Strong cash flow management is essential to keeping projects running smoothly and profitably. Learn how to navigate challenges such as upfront costs, delayed payments and ongoing financial obligations and explore practical strategies including forecasting and project reviews.

8:00 am–8:50 am PDT, Lagoon G

The NECA Project Lifecycle: From Bid to Breakthrough

Moderated by Jason Thurner, *NECA*

What separates top-performing contractors from the rest? Hear directly from leading contractors on how they're using the NECA Project Lifecycle to map, manage and elevate every phase of their projects from bid to closeout. [\[CL\]](#)

8:00 am–8:50 am PDT, Breakers L

Your Personal Critical Path

Pamela Scholefield, *Scholefield Construction Law*

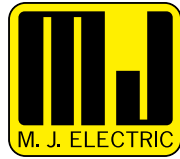

Are your best hours going to what matters most, or what shows up loudest? If you are tired of letting distractions bury the work that truly matters, you need a smarter way to work.

8:00 am–8:50 am PDT, Lagoon H

Wired for Wealth: How One Electrical Contractor Cracked the Code on Residential Service

Phil Rose and Sarah Lephardt Johnson, *Roman Electric Co. Inc.*; Josh Bone, *ELECTRI International*

What if you never chased another invoice again and your margins were 40% and climbing? This session will discuss how one contractor built a business model focused on recurring revenue, operational efficiency, customer loyalty and more. [\[CL\]](#)

Tom Nagy, President
Missouri Valley Line Chapter

The Missouri Valley (and Southwestern Line) Chapter, NECA congratulates Tom Nagy, M.J. Electric, LLC, on his induction into the Academy of Electrical Contracting! Congratulations, Tom, from everyone at the Missouri Valley Chapter, NECA.

M. J. Electric, LLC invests in and fosters trusting relationships as we safely deliver electric transmission, substation, distribution, renewable energy, power, industrial, and concrete foundation construction services that increase the security, reliability, and capacity of our nation's infrastructure. Our customers experience the benefit of our local presence with a national reach. Founded on integrity, we are committed to raise our industry's expectation for safety, quality, and project execution.

AMERICAN TECHNICAL PUBLISHERS

Apply the **2026 NEC®** with Confidence

Success in an electrical career, or in passing an NEC® exam, comes from learning to navigate the 900-plus page *National Electrical Code®*. ATP's Code-related text/workbooks help make you proficient at locating information in the Code and prepare you to pass state or local NEC® exams.

Learner Resources include:

- Code-Knowledge Activities
- Trade Competency Tests
- Hundreds of Practice Exam Questions

TRADE SHOW EDUCATION: TECHNOLOGY & INNOVATION

Manufacturers and distributors often have the best research and development teams in the industry. Join us again this year as NECA exhibitors bring you the latest and greatest updates. Education is included with trade show registration. Full course descriptions are available at www.necaconvention.org.

TECHNOLOGY & INNOVATION

MONDAY, OCTOBER 5

12:00 pm–12:50 pm PDT, Booth 128

The First Installation Standard for Class 4 FMP Systems: NECA 726 Explained

Jeff Noren, *NECA*

This session provides a comprehensive overview of NECA 726, the first installation standard for Class 4 Fault-Managed Power Systems. The session covers key components, handling requirements and quality benchmarks.

1:00 pm–1:50 pm PDT, Booth 128

AI Starts with Discipline: How Electrical Contractors Must Prepare Their Data, Documents, and Teams Before Using A.I.

Jeff Burmeister, *Egnyte*; Kelli Lubeley, *Cupertino Electric*

Artificial intelligence only delivers value when the right foundation is in place. Explore practical strategies to standardize data, improve document control and align teams for successful adoption. [\[CL\]](#)

2:00 pm–2:50 pm PDT, Booth 128

The Truth About Change

Moderated by Jason Thurner, *NECA*

This session takes an honest look at the realities of change management inside electrical contracting firms. You will hear directly from innovative contractors on what it actually takes to drive sustainable change within their companies. [\[CL\]](#)

3:00 pm–3:50 pm PDT, Booth 128

The JIW as a Limited Energy Technician

Joseph Weyel, *Big State Electric, Ltd.*

This session will explore the convergence of traditional electrical work and low-voltage systems within the emerging limited energy market, making the case for expanded continuing education opportunities to help journeyman inside wiremen develop the skills to operate as limited energy technicians. [\[CL\]](#)

4:00 pm–4:50 pm PDT, Booth 128

Going Beyond Chat Bots: How Spatial A.I. Delivers Quantifiable ROI and Operational Excellence in Construction

Jeevan Kalanithi, *OpenSpace*

This session explores how Spatial A.I. uses visual and location-based data to drive measurable improvements across the construction life cycle. You will learn how this technology reduces rework, improves collaboration and more.

TUESDAY, OCTOBER 6

12:00 pm–12:50 pm PDT, Booth 128

Prefab to Modular: Strategies for Success

Moderated by Jason Thurner, *NECA*

No two prefab journeys look the same. This session explores the full spectrum of prefabrication, from contractors launching with a single table to those operating advanced modular facilities. You will hear from contractors at various stages of maturity. [\[CL\]](#)

1:00 pm–1:50 pm PDT, Booth 128

The Connected Culture: Converting Data Visibility into Business Trust

Kris Lengieza and Kalyn Lengieza, *Procore*

Miscommunication remains one of the biggest threats to project success and profitability. Learn how creating a unified system of information improves collaboration, decision-making and safety culture.

2:00 pm–2:50 pm PDT, Booth 128

Leveraging Data to Preserve Customer Relationships

Dan Colvin, *Ferguson Electric*; Ian Hoppe, *Condoit*, Fred Sargent, *Great Service Forums*

This session focuses on how ECs can use data to strengthen and retain long-term customer relationships. You will learn how capturing and leveraging electrical system data can create lasting value beyond traditional service models. [\[CL\]](#)

3:00 pm–3:50 pm PDT, Booth 128

Power + Data: How Electrical Contractors Drive the Smart Building Era

Kit Gaines, *Leviton*; Jeff Beavers, *NECA*

Convergence across power, communications and control systems creates new opportunities and responsibilities, and this session will explore how building systems are evolving into integrated, data-driven networks and what that means for electrical contractors.

WEDNESDAY, OCTOBER 7

9:30 am–10:20 am PDT, Booth 128

When Ops and IT Align: Turning Challenges Into Shared Wins

Mica Ashmore, *Alterman Electric*; Alex Huntoon, *Newkirk Electric*

Many operational challenges are not purely IT or field issues—they exist in the gap between the two. Learn how to identify root causes across processes, systems and training to reduce delays and rework. [\[CL\]](#)

10:30 am–11:20 am PDT, Booth 128

Microsoft Copilot Masterclass: Electrical Contractors Edition

Carl Britton, *Iron Thread Consulting*

Most contractors already have access to powerful tools but aren't fully using them. Dive into practical, high-impact workflows using Microsoft Copilot to improve productivity across everyday tasks.

Congratulations

The Atlantic Coast Chapter, NECA congratulates

Carson Rogers of Chewning & Wilmer Inc.

on his induction into the Academy of Electrical Contracting.

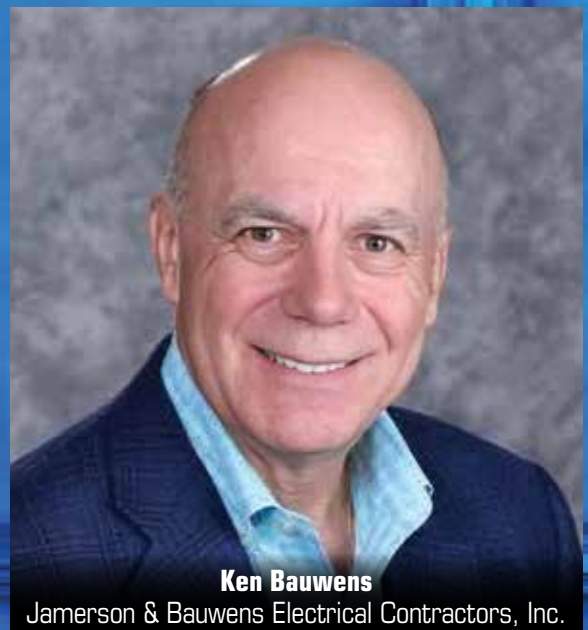

We appreciate your contributions to the Chapter and industry.

Sincerely, your friends at ACC NECA.

Jamerson & Bauwens Electrical Contractors, Inc.

TRADE SHOW EDUCATION: LEADERSHIP

LEADERSHIP

MONDAY, OCTOBER 5

12:00 pm–12:50 pm PDT, Booth 634

Leadership Qualities: What Truly Matters

Jason McCarty, *Rosendin*

This session explores the core leadership qualities that drive successful outcomes in electrical construction. You will learn how respect, credibility, character, ethics, integrity and professionalism influence team performance and project results. [\[CL\]](#)

1:00 pm–1:50 pm PDT, Booth 634

Talking About the Hard Stuff: Communicating with Teams to Reduce Conflict and Improve Performance

Jen Fry, *JenFryTalks*

Effective communication is the backbone of every successful construction project, yet tension often arises when expectations aren't aligned, instructions are misinterpreted or feedback is left unsaid. This session focuses on the everyday conflict points that emerge in team communication and shows how leaders can address them clearly and with less friction.

2:00 pm–2:50 pm PDT, Booth 634

Mentorship That Multiplies: Retaining and Developing the Next Generation

Kristy Phillips, *Southwire*

Retaining talent requires intentional development. Discover how the Mentorship Flywheel creates a compounding impact on engagement, leadership growth and long-term retention.

3:00 pm–3:50 pm PDT, Booth 634

Building Presence as a Young Leader

Ava Hudak, *Buckingham Manufacturing*

This session explores how emerging leaders can establish credibility, earn respect and lead with confidence regardless of age or experience level. This session focuses on practical strategies for stepping into leadership early, navigating team dynamics and building influence where trust must be earned.

4:00 pm–4:50 pm PDT, Booth 634

Next Man Up: Succession Planning for the Line Industry

Mike Starner, *NECA*

Learn how to identify and develop the next generation of foremen, general foremen and superintendents by looking beyond seniority or technical ability to the leadership qualities crews respect. Explore strategies including mentoring, stretch assignments, feedback and intentional development paths to prepare high-potential employees for leadership roles.

TUESDAY, OCTOBER 6

12:00 pm–12:50 pm PDT, Booth 634

Journey to Zero: Building Safer Work Environments Through Culture and Practices

Christi Webb, *3M Company*

Learn how leading organizations design systems, behaviors and processes that reduce risk and protect workers. Explore practical methods for identifying hazards, reinforcing safe practices and driving continuous improvement.

1:00 pm–1:50 pm PDT, Booth 634

The ROI of Hiring Veterans: Understanding Their Value as a Strategic Investment for Businesses

Brandy Malone, *Schneider Electric*; Chris Miles, *Sonepar*; Ronald Bailey

This session explores the measurable and strategic value of hiring veterans in the electrical construction industry. Participants will learn how veterans contribute to leadership, safety, teamwork and organizational performance. The session highlights both the tangible ROI and broader cultural benefits of veteran hiring programs.

2:00 pm–2:50 pm PDT, Booth 634

Remaining Positive in Challenging Times

Tyler Enslin

Challenging times test personal resilience and professional performance. Learn practical strategies to manage stress, maintain focus and build habits that support long-term growth.

3:00 pm–3:50 pm PDT, Booth 634

When Tensions Rise: A Practical Playbook for Jobsite Conflict

Nic Bittle

Unresolved conflict can quietly undermine productivity, trust and team performance. Learn a practical, field-tested approach to de-escalate situations and address issues without damaging relationships. Discover how to rebuild trust while maintaining accountability and leadership authority.

WEDNESDAY, OCTOBER 7

9:30 am–10:20 am PDT, Booth 634

The Conversations We Need to Have—Driving a Growth Mindset

Todd Stafford and Greg Grenier, *electrical training ALLIANCE*

Engage in real discussions about challenges, opportunities, and best practices for JATC growth. Learn how mindset, collaboration and leadership drive successful workforce expansion. Leave with insights to help guide more effective decision-making and long-term program growth.

10:30 am–11:20 am PDT, Booth 634

Overloaded Circuits—Mental Health as a Hidden Jobsite Safety Risk

Mark Dyke, *Ferris State University / Collaborative Counseling Group*

Mental overload is one of the most overlooked risks on today's job sites. Stress, fatigue and burnout have lasting impacts on judgment, communication and hazard recognition. Learn to identify early warning signs and apply practical, field-ready strategies to reduce risk and prevent incidents. Walk away with tools to integrate mental health into existing safety practices without adding complexity.

The Greater Sacramento Chapter NECA
proudly honors Greg Dye on his posthumous induction
into the Academy of Electrical Contracting.
This fellowship recognizes Greg's achievements
as a community leader and mentor,
as well as his commitment to our industry.

NATIONAL ELECTRICAL CONTRACTORS ASSOCIATION • HUDSON VALLEY CHAPTER

CONTRACTOR SOLUTIONS MONDAY, OCTOBER 5

12:00 pm–12:50 pm PDT, Booth 134

Solving the Doubling of Electricity Demand Between Now and 2050

Brian Nelson, *ABB*

U.S. electricity demand is expected to double by 2050, creating one of the largest opportunities the electrical industry has seen in decades. Explore how emerging technologies, renewables, storage, intelligent grid systems and microgrids are transforming project scope and service opportunities.

1:00 pm–1:50 pm PDT, Booth 134

Seeing Lean: A Virtual Walk to Reduce Waste

Kyle Brown, *Milwaukee Tool*; Mica Ashmore, *Alterman Electric*

Waste is often hidden in everyday job site routines, quietly driving up cost and inefficiency. Learn how to spot inefficiencies, identify their root causes and develop practical action plans for improvement.

2:00 pm–2:50 pm PDT, Booth 134

Strategies for Building Data Centers Faster, Safer, and Smarter

Ryan Cook and Steve Waller, *Atkore*

This session examines practical strategies for addressing the growing demand and complexity of data center construction. Participants will learn how to improve speed, safety and scalability through real-world contractor examples. The session highlights tools, training approaches and sustainable solutions.

3:00 pm–3:50 pm PDT, Booth 134

Managing Your Cyber Risk in the Age of Artificial Intelligence

Dean Rhoades, *Federated Insurance*

Cyberthreats are growing in frequency and complexity, creating real risks for electrical contractors. Learn how to identify common threats such as phishing, ransomware and data breaches and understand where your organization is vulnerable.

4:00 pm–4:50 pm PDT, Innovation Zone,

Advancing Electrical Fabrication Through Lean Manufacturing Principles

Larry Feskanich, *Greenlee*

Improving fabrication performance requires more than effort, it requires the right systems and discipline. Discover how lean manufacturing principles such as 5S, Kaizen and ergonomic assessments drive measurable gains in efficiency and safety.

TUESDAY, OCTOBER 6

12:00 pm–12:50 pm PDT, Booth 134

Optimizing Fleet Management in Electrical Construction

Moderated by Amy King Lewis, *Oklahoma State University*

Fleet management is a major cost and operational challenge for electrical contractors, often managed without clear benchmarks. This session shares insights from ELECTRI International's research, offering practical strategies to improve efficiency, control costs, enhance safety and make smarter decisions around leasing, purchasing, maintenance, telematics and growth. **[EI]**

1:00 pm–1:50 pm PDT, Booth 134

Labor, Safety, and Profitability in the Age of Limited Energy: Lessons from the Miller Electric Case Study

Moderated by Mahmoud Ibrahim, *Panduit*

Delivering complex projects with limited labor requires smarter approaches to installation and design. Explore how Class 4 Fault-Managed Power dramatically reduced installation time, minimized disruption and improved safety in a real-world case study. **[CL]**

2:00 pm–2:50 pm PDT, Booth 134

Prefab for All: How to Win More Bids & Work Efficiently

Dustin Chatham, *Crawford Electric, a Sonepar Company*

Learn how contractors of all sizes can implement prefab, whether you've never used it before, have some experience and want to be more strategic, or have invested in prefab and are looking for ways to be more efficient and leaner.

3:00 pm–3:50 pm PDT, Booth 134

Look-Aheads and Project Planning: Closing the Loop

Ryan Meitl, *RIVET Work*; Kyle Sutter, *Westphal & Co. Inc.*

Effective planning requires alignment between long-term strategy and day-to-day execution. Learn how to integrate field-level look-aheads with broader project forecasting to improve coordination and performance and explore how better planning visibility supports workforce capacity, scheduling and decision-making.

WEDNESDAY, OCTOBER 7

9:30 am–10:20 am PDT, Booth 134

Maximize the Schedule of Values

Mark Federle, *Marquette University*

A well-structured schedule of values is a powerful tool for managing both project execution and financial performance. Learn how to build and use it to improve payment timing, forecasting and resource allocation from preconstruction through closeout.

10:30 am–11:20 am PDT, Booth 134

A Financial Maturity Toolbox to Measure the Health of ECs and their Projects

Hala Nassereddine; Justin Kohlman, *Schaeffer Electric Co.*

This session explores the key performance indicators (KPIs) identified as most critical for project managers and executives, presents an approach companies can use to identify their own KPIs, sheds light on surety KPIs and demonstrates the power of financial visuals from a contractor's perspective. **[EI]**

*Congratulations,
Mike!*

The Northeast Line Chapter, NECA, warmly congratulates Mike Gilchrist on receiving the prestigious Robert L. Higgins Association Executive Distinguished Service Award.

We also celebrate your induction into the Academy of Electrical Contracting. Thank you for your exceptional leadership, dedicated service, and unwavering commitment to our industry!

The Academy of Electrical Contracting Congratulations!

Robert E. Meadows

President of Morrow-Meadows Corp.

The honor of a fellowship in the Academy of Electrical Contracting is the most prestigious award bestowed upon an individual in our industry. Desired by many; however, it is awarded to a select few. A privilege reserved for only the best of the best.

Please join the Orange County Chapter NECA and the Los Angeles Chapter NECA in congratulating Mr. Rob Meadows on his Academy fellowship.

Ambassador and Affiliate sponsors as of Sept. 10

Leadership That Leaves the Industry Stronger.

Congratulations to **LeeAnn Cochran** on being named a 2026 Fellow of NECA's Academy of Electrical Contracting.

Through two decades as CEO, LeeAnn has guided Cochran with conviction, compassion, and an unwavering commitment to excellence. Her leadership has expanded opportunity, strengthened safety and workforce development, advanced our company, and served the electrical contracting industry with distinction.

Congratulations, LeeAnn.
Cochran is stronger, and our industry is better, because of your leadership.

LeeAnn Cochran
CEO, Cochran, Inc.

Congratulations **JOSEPH BARNARD**

The St. Louis Chapter, NECA
proudly congratulates
President Joe Barnard on
earning the McGraw Award
for his extraordinary
contributions to the industry
and exceptional performance

Sponsored by **ELECTRICAL CONTRACTOR**, the NECA Showstopper Showcase features entries representing the latest solutions on the market. Below is a selection of the products; all the Showstoppers will be on display Oct. 5-7, 2026 in Booth 5911 at NECA 2026 Las Vegas. The winners will be profiled in the January 2027 issue of **ELECTRICAL CONTRACTOR** magazine. This list has been lightly edited for style and clarity.

3M

3M™ Cable Quality Preparation System (CQPS) is designed to assist an installer in preparing medium-voltage cable for cable accessory installation.

ABB

ReliaHome® Flex is a modular energy management system that lets you add energy-intensive loads without upgrading the main panel or utility service.

ABB

ReliaHome® ELITE AFCI Circuit Breakers are a new generation of residential circuit breakers powered by adaptive, machine-learning arc-fault technology.

ABB

ELITE Dual Function Circuit Interrupters (DFCI) are a new generation of residential circuit breakers powered by adaptive, machine-learning arc-fault technology.

ABB

Merchandised ProS Enclosed Starters are designed for dependable motor control applications in both commercial and industrial environments.

ABB

Nonmetallic Liquid-tight Type A Fitting delivers a complete Type A nonmetallic conduit and fitting solution engineered for washdown, wet and corrosive industrial environments.

ABB

Superstrut® & Kindorf® U-shaped Strut Washer provides secure load distribution, fastener stability and proper alignment for strut systems.

ABB

Ty-Heat PEEK High-performance Cable Ties are a breakthrough fastening solution for applications involving radiation, chemicals and temperatures up to 464°F.

ABB

Ty-Rap® Nylon 6/12 UV-Resistant Cable Ties withstands UV radiation, extreme outdoor conditions, chemical exposure and moisture.

ABB

ReliaMod® Pack Metering is a self-contained metering enclosure offered with 125A and 200A sockets in configurations from two to six meter sockets.

ABB

Sensorfact Energy Management Platform combines real-time monitoring, actionable insights and seamless integration to turn every installation into a sustainable success story.

ACCESS COINS

Access Evo is an A.I.-powered intelligence for electrical contractors. Cut month-end time by 60%–85%, catch overruns early and boost billable hours by 25%.

AECINSPIRE

TRACKDIT is an A.I.-powered orchestration layer synchronizing materials, teams and workflows across the entire construction project supply chain.

ALLIED BIM

Bender Auto Calibration feature allows all users of manual or CNC tube-bending applications to auto calibrate conduit across all types. Bend right, the first time.

ARLINGTON INDUSTRIES

CableAble™ Commercial-Grade is a nonmetallic support bracket engineered for commercial applications. Rated for maximum conduit and wire load for power, data and control systems.

AUGMENTA

ACP 2.0 is a browser-based A.I. platform that routes, coordinates and details electrical raceways.

BAND-IT, IDEX INC.

Electric Bantam Tool is a powered cordless cable-banding tool that speeds installation, reduces installer fatigue and delivers consistent band tension every time.

BAND-IT, IDEX INC.

LokMate Clip Fastening Tool is designed for electrical installers. LokMate safely fastens BAND-IT clips in cable trenches, overhead pathways and tight spaces.

BODINE

BeamGuide sets a new standard in emergency egress with installer-friendly exits, combo units and lights designed for simplicity and flexibility.

BRADY CORP.

i4311 Transportable Industrial Label Printer is a portable 4-in. label printer with all-day battery and ergonomic handle. Supports 65+ materials and 20-second changeovers.

BRAH ELECTRIC

Shunt Trip is for GE Spectra RMS molded case circuit breaker.

BRAH ELECTRIC

200A Fusible Bus Plug is a direct replacement for ITE BOS16454, BOS16454R.

BUCKINGHAM MFG.

High-Angle Rescue Kit is designed for rapid deployment in ground-based and structural rescue scenarios, including lattice towers and elevated work environments.

CABLE CADDY

RollProfi RAIL Cable Drum Roller is compact and lightweight, yet handles drums up to 3,300 lbs. Safe, ergonomic and sturdy.

CONEST SOFTWARE SYSTEMS

Conest A.I. Assistant is your built-in expert for IntelliBid and SureCount, providing instant guidance and support right where you work.

CURRENT TOOLS INC.

256 | 5-in. and 6-in. Hydraulic Conduit Bender is the only job site bender that bends 5- and 6-in. Rigid to a 90° bend in one shot.

DEWALT

8-in. and 10-in. SLIDELOCK Pliers Set (2 pc.) provides more gripping area and a longer reach.

DEWALT

Keying Bit Holder Set features a locking design to hold bits in place and quick bit ejection. The DEWALT® keying bit holder set helps you get back to work fast.

DEWALT

7/8-in. Step Drill Bit is equipped with a double-flute design. The DEWALT® 7/8-in. step drill bit helps deliver up to 400 holes drilled.

DEWALT

20V MAX XR® Oscillating Multi-Tool makes fast, efficient cuts through wood, metal, drywall, PVC and plastic with the 20V MAX XR® Oscillating Multi-Tool.

DEWALT

ATOMIC™ 20V MAX 4-in. Angle Grinder helps complete high-powered applications in tight spaces with the ATOMIC™ 20V MAX 4-in. angle grinder that delivers optimized maneuverability and 755 MWO.

DEWALT

15A Power Controller is an efficient charging solution that enables bulk charging on a dedicated 15A branch circuit and can charge up to 24 batteries (sold separately) in less than 5 hrs.

ELECTRIC EASE

Estimating Software is an all-in-one A.I.-powered electrical estimating software that helps contractors work faster while staying in control.

ELECTRI-FLEX CO.

Stainless Steel UL Listed Liqueatite® electrical conduit delivers verified safety, compliance, durability and superior crush strength.

ELEGRP

Tamper-Resistant Wall Outlet with Night Light is a modern wall outlet with a built-in dusk-to-dawn night light, adjustable brightness, 3,000K/4,000K/6,000K color options for bedrooms, hallway and kids' rooms.

ELEGRP

Outdoor Power Boxes with Weatherproof Cover are outdoor-rated power inlets for generator transfer and EV charging, with durable PC enclosures and weatherproof covers.

EZ ELECTRICAL PRODUCTS

Rampage is made in USA. Polycarbonate junction boxes replace traditional PVC with innovative features like a snap-on lid, captive fasteners, NEMA 3R, 4X, 6P.

FAB ELECTRICAL PRODUCTS

Terminating Booklets are similar to Wire Marker booklets, but better.

FALLTECH

60-ft. FT-R® Arc Flash SRL-R with Dielectric Hook provides arc-resistant protection with lightweight handling and built-in retrieval capability for controlled worker rescue in extreme environments.

FIREXNULL INC.

FXN-S1 Outlet Guard uses heat-activated microcapsules to release clean suppression agent inside electrical boxes, with no power or wiring.

FLUKE CORP.

CertiFiber Max delivers fast, accurate certification of high-density fiber networks, testing up to 24 fibers in under one second for A.I. data centers.

FLUKE CORP.

FEV500 Simplifies fast DC EV charger testing with one tool for safety, communication and interoperability checks to reduce costly downtime.

FLUKE CORP.

GFL 1500 Quickly locates solar ground faults with noncontact tracing, helping technicians reduce downtime and restore energy production faster.

FLUKE CORP.

SmartTrace™ 2082 Helps teams safely locate, map and manage underground assets with precision tracking to reduce risks, delays and damage.

FLUKE CORP.

TC03A Thermal Camera Delivers professional thermal imaging in a compact mobile solution, helping technicians quickly detect faults and prevent downtime.

FLUKE CORP.

ii01 Acoustic Camera Brings professional acoustic imaging to more technicians, quickly locating leaks and hidden issues to reduce downtime.

FORREELS LLC

FORREELS is a fully patented fish tape accessory that conforms to all major brands of fish tape reels.

GREENLEE TOOLS INC.

12-Ton Weight Optimized Crimping Tool with IntelliCRIMP® and broad connector UL compatibility.

GREENLEE TOOLS INC.

Insulator Tester Greenlee's IT-5 identifies dielectric defects in porcelain and glass suspension insulators.

HARDHAT ROBOTICS

SparkE-B: Energization Robot is a teleoperated robot meant to handle energization and de-energizing of all makes of high-voltage panels.

HILTI

VC 2-22 PK is a versatile, lightweight, cordless vacuum designed for quick job site cleanup and maximum mobility.

HILTI

SB 5-22 Band Saw is a 3¼ in. cordless band saw purpose-built to bridge the gap between compact and deep-cut band saws.

HILTI

P3D 800 Laser Scanner is a 3D laser scanner for reality capture on job sites; it creates faster and more accurate point clouds.

HILTI

SF 30M-22 Magnetic Drill Press is safer, more reliable steel drilling with a mechanically activated permanent magnet that holds securely to steel.

HILTI

KH-EZ IQ Push-to-Connect Screw Anchor works for faster installation of threaded rod to concrete ceilings with a push.

HILTI

VC 4X-22 PK is a compact cordless dust extractor that delivers powerful wet and dry cleanup for construction applications.

HILTI

DD 110-U-22 Cordless Core Drill is a versatile cordless diamond coring system designed for handheld and rig-mounted drilling in concrete and masonry.

HUBBELL

Hinged Conduit Body is designed to have the benefits of a traditional conduit but is fixed with a hinged cover and integral gasket.

HUBBELL

Premium Weatherproof ParkPost Heads adds unique style and function to your outdoor power enclosure.

HUBBELL

Burndy Patriot—Milwaukee Battery Platform Introducing the Milwaukee battery platform for the BURNDY Patriot tool line.

HUBBELL

PowerGain™ High-Power Solutions for next-generation data centers.

HUBBELL

600V Triplex VariStrip™ Stripper is designed specifically to accommodate the most common triplex formations and allows crews to strip 600V URD cables from 1/0 AWG to 350-kcmil AWG cable.

HUBBELL

Cable Cleats are available in single, trefoil or quad configurations.

IDEAL ELECTRICAL

Insulation Tester Plus is an all-in-one tester with insulation, low-ohm and multimeter functions plus Bluetooth for automated testing, faster diagnostics and safer fault detection.

INNISFREE TOOLS

Old Glory 3-lb./24-in. ductbank hammer is designed specifically for UG conduit installation.

INNISFREE TOOLS

Roll'er-On Crews will glue or lube UG conduit 2X faster with ROLL'ER-ON disposable solvent and lubricant application components.

JS PRODUCTS INC.

10-Piece Electrician's Knock Out Set is up to 25% faster than bi-metal hole saws. It delivers fast, clean conduit knockouts with less installation time.

KIDDE

FireX Wire-Free Interconnect Smoke + CO Alarm

Built for pros: FireX Smoke + CO Alarm delivers code-compliant dual-sensor protection with voice alerts, wire-free interconnect and self-testing.

KIDDE COMMERCIAL

MiniLaser Aspiring Smoke Detection is the smart choice for demanding, single-zone spaces. Engineered for small to medium-sized spaces, MiniLaser delivers the reliability.

KLEIN TOOLS INC.

Ratcheting FastBit Tru-Grip Screwdriver provides fast, versatile driving with forward, fixed and reverse ratcheting modes.

KLEIN TOOLS INC.

LiftPro™ 20-in. Wall and Modular Rail System delivers organized, accessible tool storage for bucket trucks, man lifts and scissor lifts.

KLEIN TOOLS INC.

Auto-Loading Retractable Utility Knife delivers fast, efficient cutting with a dual-sided blade magazine and one-handed auto-loading operation.

KLEIN TOOLS INC.

Ratcheting Combination Slide-Lock Wrench Set, SAE delivers secure fastening, improved access and portability for a wide range of applications.

KLEIN TOOLS INC.

Insulated T-Handle and Hex Bit Set, 9-Piece delivers the safety, control and reach professionals need for energized work environments.

KLEIN TOOLS INC.

Phoenix™ Series Panoramic Welding Helmet provides enhanced comfort, visibility and performance with integrated cooling, LED lighting and a panoramic view.

KLEIN TOOLS INC.

Rotating GFCI Outlet Tester keeps the display visible in any outlet orientation while providing digital voltage, GFCI trip time and wiring diagnostics.

KNIPEX TOOLS LP

KNIPEX Slim Knips Precision Cutting Pliers are compact and cut and tighten cable ties in one tool. Slim design reaches tight spaces. Lock keeps tool closed during transport.

KOLBI IDENTIFICATION PRODUCTS

Vault Placards identify circuits, hazards, ownership and numbered pathways so crews can safely locate the right lines every time.

L.H. DOTTIE CO.

Defender 6-in-1 Insulated Multi-Bit Screwdriver is fully insulated and VDE certified to IEC 60900. This tool delivers reliable shock protection with the durability every electrician needs.

LEGRAND

PowerHold receptacles speed installation with fast terminations, secure wire retention and color-coded levers for safer connections.

LEGRAND

FlameStopper 4-in. kit is a UL-classified fire-rated pathway solution that simplifies installation in fire-rated walls.

LEGRAND

65W Hospital Grade USB Outlet is a fast, reliable dual USB-C charging with 65W power, overcurrent protection and a lifetime warranty for demanding environments.

LEGRAND

Cablofil® Cable Bus delivers reliable high-capacity power distribution with fast lead times, field adjustability and simplified installation.

LEVITON MFG. CO. INC.

Decora Smart High Current 60A Controller is a UL3141 certified power control solution that can be added to a home with undersized service.

LEVITON MFG. CO. INC.

ArcArrest® Switch-Rated Pin & Sleeve Devices provides a local disconnect as required by NEC and are rated for both branch and motor circuit disconnects.

LEVITON MFG. CO. INC.

VerifEye® Series 2500 Submeter is a versatile energy monitoring solution designed for both pulse output and Modbus RTU based power consumption.

LEVITON MFG. CO. INC.

GreenConnect™ Wireless makes wireless lighting control easy with Push-to-Pair technology, enabling fast, scalable single- and multi-zone control without hubs.

LEVITON MFG. CO. INC.

EV Outdoor Outlet Line: Metal and Clear simplifies outdoor plug-in EV charging with complete, code-compliant, EV-ready solutions.

LEVITON MFG. CO. INC.

7-in. Surface Mount Downlight has a low-profile design that offers 1,100 lumens of light and adds a modern touch to any space.

LEVITON MFG. CO. INC.

LED Advanced Decora Slide Dimmer for flicker-free control engineered to match the performance of high-end dimmers; no neutral required, and an ultra-slim design.

LEVITON MFG. CO. INC.

Decora Smart Wi-Fi Dimmer Switch provides full range dimming performance and custom settings

LIND EQUIPMENT

Hitching Post is a portable 50A job site equipment charging station with GFCI outlets and built-in Beacon360 Blaze light. Folds for transport. UL & CSA approved.

LUTRON ELECTRONICS

Wired Dual Technology Ceiling Mount Sensor is a new wired dual technology occupancy sensor that packs more features and technology into an improved aesthetic available in multiple colors.

LUTRON ELECTRONICS

Diva LED+ Pro Max Dimmer can handle the broadest range of demanding lighting loads with high-capacity phase-selectable dimming in the classic Diva paddle design.

MAG DADDY LLC

Magnetic Mounted LV Pulley is a low-voltage cable-pulling solution with magnetic mount and pro-grade pulley. Install in seconds; no need for drilling, anchors or unnecessary holes.

MILWAUKEE TOOL

BOLT™ Personal Voltage Detector provides reliable voltage detection, clear alerts, helmet compatibility and rechargeability.

MILWAUKEE TOOL

PACKOUT™ Wire Pulling XL Crate stores and dispenses six wire spools, providing organized access and retention.

MILWAUKEE TOOL

M18™ Brushless Pipe Threading Oiler delivers cleaner, portable pipe threading with precise oil control, spill containment, filtration and runtime.

MILWAUKEE TOOL

M18 FUEL™ 1K Wire Puller Kit Delivers powerful, efficient wire pulling with reduced effort and enhanced versatility.

MORRIS PRODUCTS INC

Titan® Flex Capacitor™ provides electrical contractors with a flexible solution for hundreds of HVAC applications.

NORTH SHORE SAFETY DBA

TECMARK CORP.

100A GFCI Listed to UL 943-HF Rating is the first agency-listed 100A, 208V three-phase and one-phase GFCI to the new UL943 HF (high-frequency) standard

NORTHGRID

NorthGrid Asset Tracker is an electrical inspection and asset management platform that streamlines field inspections and builds a searchable equipment database.

NSI INDUSTRIES

Bridgeport® 40ASP E-Z LOCK® Range-Taking Connector New advanced range-taking E-Z LOCK® connector with E-Z Edge™ Technology delivers broader cable coverage and fast, installer-friendly connections.

NVENT

CADDY Prefab Lighting Control Box Assembly delivers a faster, safer and more efficient way to install LED lighting control boxes.

ORBIT INDUSTRIES INC.

Universal Conduit/Cable Holder 2-IN-1 supports and positions cable or conduit with two 1½-in. openings that separate into two independent holders.

ORBIT INDUSTRIES INC.

True 5-in. Square Box With ½-in. and ¾-in. KOs accommodates multiple lighting control relays and power packs with dedicated ½-in. and ¾-in. KOs and 71.8-cu.-in. capacity.

ORBIT INDUSTRIES INC.

Butterfly Cable/Conduit Support Hanger supports multiple conduit runs from the bottom knockouts of suspended electrical boxes with tool-free threaded rod installation.

ORBIT INDUSTRIES INC.

Rigid to EMT Couplings Compression Type New 2½-in. to 4-in. malleable iron compression couplings expand Rigid/IMC-to-EMT transitions for large-diameter conduit installations.

ORBIT INDUSTRIES INC.

EMT to Liquid-Tight Combination Couplings Compress New 2½-in. to 4-in. compression couplings expand EMT-to-liquid-tight transitions for large-diameter conduit installations.

ORBIT INDUSTRIES INC.

Rigid to Liquid-Tight Couplings Compression Type New 2½-in. to 4-in. compression couplings expand Rigid/IMC-to-liquidtight transitions for large-diameter conduit installations.

ORBIT INDUSTRIES INC.

Liquid-Tight Sealing Rings expands liquid-tight sealing rings with new 5-in. and 6-in. trade sizes for large-diameter conduit installations.

ORBIT INDUSTRIES INC.

EMT & Rigid Combo “LL/LR” Conduit Body LLR configuration combines left and right side hub openings, replacing separate LL and LR conduit bodies for Rigid/IMC and EMT conduit.

PANDUIT CORP.

MP550 PXE™ Series Mobile Printer delivers portable Wi-Fi labeling with a color touchscreen, keypad and fast printing.

PINNACLE SAFETY PRODUCTS, LLC

Electrical Enclosure Lockout Cable Extension expands the PS1 panel lockout system to a broad range of unique applications beyond the reach of standard LOTO devices.

PROCORE

Procore Materials tool brings powerful, industry-leading materials management capabilities to the Procore platform for current and future customers.

RACK-A-TIERS MFG. INC.

Crackit Bracket are snap apart wire brackets. They are designed to simplify the process of rough-in and keep cable runs clean, organized, and easy to manage.

REALTIMEAIS.COM

Cloud Gateway connects IoT devices to the cloud for 24/7 monitoring, predictive maintenance, alerts and NFPA 70B compliance.

SCHNEIDER ELECTRIC USA

ASCO 7000 Transfer Switch with PowerLogic Source delivers seamless emergency power transfer with PowerLogic™ controls, predictive outage detection and advanced monitoring.

SCHNEIDER ELECTRIC USA

ASCO 300 SERIES Power Transfer Switch simplifies backup power with multivoltage flexibility, predictive outage detection and ratings up to 600A.

SCHNEIDER ELECTRIC USA

Square D QO & Homeline High-Frequency GFCI breaker reduces nuisance trips from modern loads while providing reliable ground-fault protection.

SIEMENS INDUSTRY INC.

IP20 Plug-in Breaker solution with 3VA6 delivers touch-safe, finger-proof (IP-20) protection while enabling rapid, wiring-free maintenance.

SIEMENS INDUSTRY INC.

Inhab Power Mod with RapidFix is a modular multifamily metering solution that streamlines EV charging and solar readiness.

SIEMENS INDUSTRY INC.

Sm@rtgear is an intelligent power distribution solution that connects low- and medium-voltage equipment to provide real-time visibility diagnostics.

SIEMENS INDUSTRY INC.

Acend™ Intelligent Notification offers advanced, addressable protection for modular fire systems with real-time visibility.

SOUTHWIRE

Flame-Retardant CAMV™ Covered Conductor is a patent-pending flame-retardant covered conductor designed to reduce utility power outages caused by tree contact and help mitigate wildfires.

SOUTHWIRE

Re3TM MV Cable Life Safety Sustainability Calc is a patent-pending medium-voltage cable design tool that generates a life, safety and sustainability index to evaluate cable options.

SOUTHWIRE

Universal Industrial Covers for multiple wired device applications, featuring a flush adapter plate design and crushed corners for standard screws.

SOUTHWIRE

Split Extension Ring installs without disconnecting wiring, improves box access and reduces installation time during rework.

SOUTHWIRE

Snap In Universal Box Positioning Bracket supports 4-in., 4¹¹/₁₆-in. and 5-in. steel boxes, allows easy repositioning and enables box removal without detaching.

SP PRODUCTS

HDPE to EMT Transition Coupling helps transition from HDPE conduit to EMT conduit.

SP PRODUCTS

Flex to EMT Transition Coupling helps transition from flexible conduit to EMT conduit.

SP PRODUCTS

PVC FA transition couplings PVC female adapter helps transition to rigid conduits.

SP PRODUCTS

PVC FA to EMT Transition Coupling PVC FA helps transition to EMT conduit.

SP PRODUCTS

PVC FA transition couplings to Liqueatite PVC FA adapter transition coupling to Liqueatite/Selatite. No reaming is required.

SP PRODUCTS

HDPE to Rigid transition Coupling enables transition from HDPE conduit to galvanized rigid conduits. Used in underground trenches, stub-ups, wiring transformers and many more applications.

SPORTSBEAMS LIGHTING INC.

Orbit Series Lighting Fixtures have unmatched reliability and RGB-W capabilities, makes the versatile Orbit Series a great fit across all entertainment and commercial settings.

SUREWERX

Hi-Vis FR/Arc-Rated Safety Jacket and Bib is built for maximum protection and durability, these FR and arc flash-rated jackets and overalls meet ASTM 1981, NFPA 70E and CSA Z462 standards.

SUREWERX

Arc Shield HHIS is a lightweight hard hat integrated shield system providing protection during an arc flash event.

SUREWERX

Oberon Electrical Safety Rescue Device

30-ft. emergency rescue strap for rapid removal of workers from electrical hazards following an arc flash or shock incident.

TRADE BUILT TOOLS

The Hole Shot is the fastest, most accurate way to locate wall penetrations, identify obstructions and measure for bends.

TRADE HOUNDS

Trade Hounds Prop provides free estimating, quoting and invoicing for trades. Estimate faster. Quote professionally. Get paid—without the paperwork.

TRIMBLE

Trimble A.I. Capabilities for Electrical Estimating

offers new A.I. capabilities across Trimble's electrical estimating solutions to automate takeoff from drawings to create up to 60% time savings for contractors.

TRIMBLE

ProjectSight 360 Capture Protect profit margins from unfair back-charges and rework with indisputable, time-stamped visual proof of installations.

TYNDALE CO.

Workwear Signal Hi-Vis Sun Shirt

Hi-Vis lightweight sun-shield shirt offers lightweight FR protection, UPF 35+, CAT 2 safety and moisture-wicking comfort for all-day wear.

TYNDALE CO.

Versa Flex Regular Fit Cargo Pant combines lightweight comfort, durable performance and CAT 2 FR protection.

VOLTEC POWER & LIGHTING

50A Duplex Temp Power Distribution Box with integrated wheels and extendable suitcase handle.

WEA TOOLS

KK VDE Safe-Torque Speed Control Cabinet Set 1 combines two insulated Safe-Torque Speed wrenches, a bladeholding screwdriver and 20 insulated blades stored in a textile box.

WESANCO-ZSI

Strut Krack is a raceway divider for strut channel that separates power, signal, emergency and general circuits to help support code-compliant cable.

WIHA TOOLS

20-Piece Insulated TorqueVario-S and SlimLine Set

delivers precise 10–50 in./lbs. torque with ±6% accuracy, audible click feedback and insulated SlimLine blades.

WINDSOR WIRE

Customizable Tray Cable is made to order customizable tray cable with no MOQ to meet your job site need.

EXHIBITOR LIST

Attendees can see what's new in the industry, keep abreast of market developments, develop new business contacts, and solve specific problems. Exhibitor list as of Sept. 2, 2026.

The Tennessee Chapter, NECA proudly celebrates Michael Young of Young Electric Company for his induction into the NECA Academy of Electrical Contracting. Michael's outstanding commitment and years of dedicated service to our Chapter and the electrical industry have earned him this prestigious honor.

Thank you, Mike—this recognition is truly well deserved!

Silent Auction

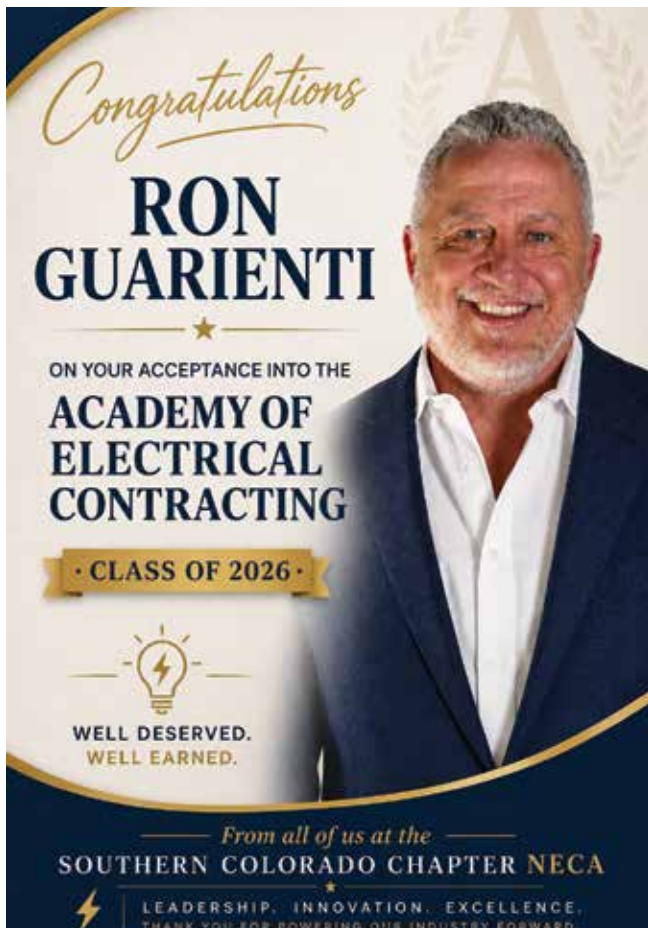

MATES North America Pilot

The NECA Gives Back program supports the electrical construction industry and the communities we serve by promoting meaningful impact where it's needed most.

This year, we are proud to partner with the **MATES North America Pilot**, a research-backed suicide prevention program. Focused on building peer support networks across the construction industry, the program equips workers to recognize when colleagues may be struggling and connect them to help. With construction facing one of the highest suicide rates of any industry, this partnership reflects a shared commitment to improving mental health outcomes and fostering a culture where it's okay to speak openly and seek support.

The NECA Gives Back Silent Auction will return this year with more items than ever before. All proceeds will directly benefit the MATES program and its mission to drive real, lasting change in our industry.

NEC COMPLIANT

CABLE & CONDUIT TRANSITIONS

Ideal for data center remote power panel feeds, equipment feeds, panels, and EV charger in parking garages, Arlington's Listed CableStop® Transition Fittings provide a fast, cost-effective way to transition feeder cables into 1.25", 2.5", 3", and 3.5" EMT, IMC, and RMC conduit.

Combining Arlington's patented 8412 series cable fittings with conduit fittings, CableStop® simplifies transitions to larger knockout sizes while reducing SKUs. Available with set-screw or compression connections, each fitting includes multiple end-stop bushings and a free sizing template for quick, accurate installation.

COPPER TO THE CORE™

Where efficiency meets safety.

Safe, reliable products from a trusted brand.

As a contractor, safety and efficiency are at the core of every job you take on. Choosing copper-only conductors ensures you're installing the most reliable, high-performing wiring solution available for residential applications.

Copper delivers superior conductivity, helping reduce power loss and maintain consistent, dependable performance throughout the home. Its natural resistance to oxidation supports secure, long-lasting connections that stand up to the demands of real-world installations. That means fewer risks, and greater confidence in every circuit you complete.

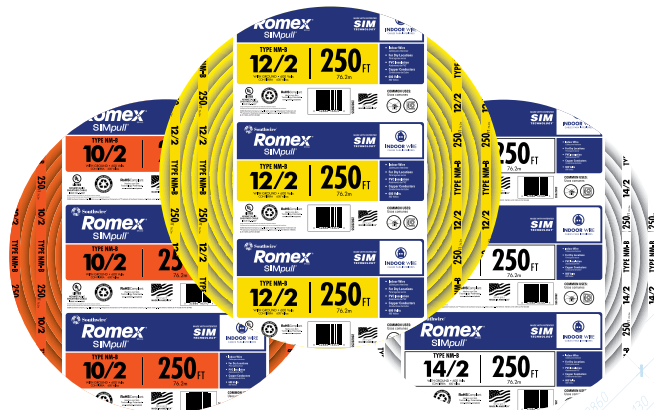

By selecting copper-only conductors, you're providing homeowners with a high-quality installation that meets safety codes, supports long-term reliability, and reflects the professionalism of your work.

Choose copper-only conductors for a safe, more efficient, and dependable electrical installation.
